I. Launch Word

To start Word 2013, click on the **Start** button, select **All Programs**, select **Microsoft Office**, and then select **Microsoft Word 2013** from the menu options.

A **Microsoft Word**  Icon may also be available on your desktop for quick access. Double click on the icon to start the application.

II. Window and Ribbon Features

The screen shot below displays the primary components of the Word 2013 interface.

A. Terms

The table below consists of definitions for the Microsoft Office features.

	Term	Description
1	Quick Access Toolbar	Displays quick access to commonly used commands.
4	File Tab	The File tab has replaced the Office button in 2007. This area is called the Backstage which helps you to manage the Microsoft application and provides access to its options such as Open, New, Save As, Print, etc.
2	Ribbon Tab	Title or name of the specific Ribbon.
3	Ribbon	Displays groups of related commands within tabs. Each tab Provides buttons for commands.
5	Group	Contain category of command buttons.
6	Show Dialog Box	Show additional options.

B. Use the Ribbon options to select and process your commands.

Microsoft Word 2013 uses **Tabs** instead of menus to organize various functions. In addition, command buttons have been placed in a **Group** within the **Ribbon**. The **Dialog Box Launcher** in a group shows additional options.

III. File Tab

The **File** tab provides you with the **Backstage** that provides information pertaining to your document and options to help setup your window defaults. The Backstage also contains standard commands such as, **Save**, **Save As**, **New**, **Print**, etc.

IV. Templates

Microsoft Office has a variety of predesigned templates within specific categories.

A. Open Templates

1. Select the **File** tab, and then click on the **New** option.
2. The **Available Templates** window will appear.

V. Quick Access Toolbar

Microsoft Word 2013 has a **Quick Access Toolbar**, so you can have quick access to your most used commands.

A. Add Commands

1. To add your most used commands to the **Quick Access Toolbar**, click on the drop-down arrow next to the **Quick Access Toolbar**.
2. The **Customize Quick Access Toolbar** option panel will appear.

3. Click on your desired command option to be placed on the **Quick Access Toolbar**.

VI. Save a Document A. Save

1. Click on the **File** tab, then select the **Save As** option to save a new copy document permanently to your hard drive or other storage device.

If you pressed SAVE button then saved the current document with current changes to your hard drive permanently.

2. The **Save As** window will appear.

3. In the **Directory** sections on the left side of the window, click on the icon where you wish to save your document. *In this exercise click on the **Desktop**.*
4. In the **File Name** box, type your desired document name, and then click on the **Save** button.

VII. Select Text

You must select text before you can change the format. You can use the mouse to select text in a variety of ways which is explained in the table below.

Select	Action
any text	Click at the beginning of the area and press the Shift key As you click at the end of the area. You can also drag Across the text you want to select.
a word	Double click on the word.
a line	Place the mouse pointer in the left margin. Position the Mouse pointer next to the desired line and click once.
multiple lines	Place the mouse pointer in the left margin next to the first Desired line and click once. Then press the Ctrl key and Click additional lines to select them.
a sentence	Press the Ctrl key and click anywhere in the sentence.
a paragraph	Place the mouse pointer in the left margin and double click next to any line in the paragraph.
multiple paragraphs	Click at the beginning of the first paragraph then hold the mouse button down while dragging through your desired paragraphs.
a document	Press the Ctrl key then place the mouse pointer anywhere in the left margin and click once.

VIII. Margins

Microsoft Word 2013 margins are defaulted to 1 inch for the top and bottom, and 1 inch for the left and right. To change your margins, use the **Margin** button found on the **Page Layout** ribbon.

A. Create Margins

1. Select the **Page Layout** tab.
2. Click on the **Margins** button.
3. The predesigned margins panel will appear.

5. Change the margin by selecting the top margin button (top and bottom 0.5" – Left and Right 0.5").

Note: If you prefer a margin not listed, then click on **Custom Margins** at the bottom of the panel to customize your margin. The **Page Setup** window will appear, and then make your desired margin choices from the window options.

IX. Line Spacing

Microsoft Word 2013 defaults the line spacing to double space (2.0). Line spacing affects an entire paragraph or document. Use the **Line Spacing** button on the **Home Ribbon** to change line spacing.

A. Add Spacing

1. Make sure the entire document is still selected.

2. Click on the **Home** tab. On the **Paragraph** group, click on the **Line Spacing** button, and then select 1.5.

X. Format a Document

Formats can be applied to any text within your document. The formatting styles are the most common way to change the appearance of text in a document.

A. Apply Format

1. Select text, and then click on your desired format from the **Home** ribbon.

Format Option Examples:

- Click on the **Bold**  button to make text bold.
- Click on the **Italic**  button to italicize text.
- Click on the **Underline**  button to add an underline to text.
- Click on the **Bullets**  button to add a bulleted list to text.
- Click on the **Numbering**  button to add a numbered list to text.

Note: Microsoft Word Mini Toolbar feature gives you quick access to common formatting commands. The mini toolbar appears faintly when you select text in your document. If you want to use this mini toolbar, you can activate it by hovering the mouse pointer on the toolbar and making your selections. If you prefer not to use the toolbar, you can continue working within the document and the toolbar will disappear.

XI. Additional Font Options

Additional font options are available, such as font effects, special styles and previewing font changes. You can view additional options by clicking on the **Home** tab, and then click on the **Dialog box launcher** on the **Font** group.

The **Font** window will appear.

In the **Effects** area, click on the check box next to **All caps**, and then click on the **OK** button.

Note: The **Font** window contains additional formats you can select from.

XII. Text Alignment

Microsoft Word 2013 aligns paragraphs four different ways relative to the left and right margins: left, center, right and justified. The Word 2013 default paragraph alignment is left. You can change paragraph alignment by clicking on an **Alignment** button, located on the **Home** ribbon on the **Paragraph** group.

Alignment Option Examples:

- First button - **Align Text Left**
- Second button - **Center Text**
- Third button - **Align Text Right**
- Fourth button - **Justify Text**

XIII. View Modes

Microsoft Word 2013 has five view modes.

1. To select a view mode, click on the **View** tab.
2. In the **Document Views** group, select your desired view mode.

View Name	Description
Read Mode	The best way to read a document, including some tools designed for reading instead of writing.
Print Layout	Check out how your document will look when it's printed.
Web Layout	See how your document will look as a webpage. This layout is also great if you have wide tables in your document.
Outline	See your document in outline form where content is shown as bulleted points. This view is useful for creating headings and moving whole paragraphs within the document.
Draft	Switch your view to see just the text in your document. This is useful for quick editing because headers/footers and certain objects won't show up, allowing you to focus on your text.

XIV. Spelling and Grammar Checks

Microsoft Word 2013 automatically checks for incorrect spelling and grammar. As you type the document, Word uses **wavy red underlines** to indicate possible spelling errors and **wavy green underlines** to indicate possible grammatical errors. To correct an error, **right-click** on a word with a wavy underline, and then click on the correction from the option panel that you desire. You can also edit the error directly in the document if no suggestions are applicable.

A. Make Error Corrections

1. In the first paragraph on the **Garden** practice document, place the mouse pointer over the misspelled text (**gardning**), click on the right mouse button, and then select the correction from the option panel.

2. In the second paragraph, place the mouse pointer over the misspelled text (**envirnment**), click on the right mouse button, and then select the correction from the option panel.
3. In the third paragraph, place the mouse pointer over the grammatical error text (**is**), click on the right mouse button, and then select the correction from the option panel.
4. In the third paragraph, place the mouse pointer over the repeated text (**on**), click on the right mouse button, and then select **Delete Repeated Word** from the option panel.

Note: To use additional spelling and grammar options, select the **Review** tab. In the **Proofing** group, click on the **Spelling & Grammar** button.

XV. Page Breaks and Section Breaks

Page Breaks and Section Breaks can be inserted anywhere within a document.

A. Insert Page Break

1. Select the **Page Layout** tab, and then click on the **Breaks** button.

2. A **Page Break** panel will appear with the Page and Section Break options.

3. Select the **Page** option. This will insert a page break that will place you on a new page in the document.

XVI. Tables

Tables offer a convenient way to display information that might otherwise be confusing and cluttered.

Microsoft Office Training		
Seminar	Time	Location
Word Processing	9:00 – 10:30	Room A
Spreadsheet	9:00 – 10:00	Room B
Presentation	11:00 – 12:00	Room A
Database	10:45 – 11:45	Room B

A. Create a Table

The **Table Tools** tab only appears when a table is selected.

To create a table in Microsoft Word, click on the **Insert** ribbon. The **Table** button is the only one option on the **Tables** group.

1. Click on the **Insert** ribbon, and then click on the **Table** button.
2. The **Table** panel will appear.

3. Select two rows and two columns as seen above. To insert a table onto your document move the mouse pointer over the number of rows and columns you desire. The cell selection will be highlighted as you move the mouse. When the desired rows and columns are highlighted, click on the last cell.

Seminar	Time
Word Processing	9:00 AM to 10:30 AM

4. Type the information in the table shown above. The insertion point will appear in the first cell of the table. Type text in the first cell, and then use the **Tab** key on the keyboard to move from one cell to the next.
5. After you type the information in the last cell, press the **Tab** key. Word automatically inserts a new blank row.

Spreadsheet	11:00 AM – 12:30 PM
Presentation	1:00 PM – 2:00 PM
Database	2:30 PM – 4:00 PM

6. Type the text seen above as you insert new rows.

XVII. Edit a Table

A. Move within a Table

Moving the insertion point and selecting text in a table is very similar to the ways you do so for regular text in a document. However, there are some procedures that are unique to tables as illustrated below.

Procedure	Description
Tab and (Shift + Tab)	Use the Tab key to move from left to right; use Shift+Tab to move from right to left.
Keyboard Arrow Keys	The up and down arrows will move up and down rows.
Move the insertion point	Use the Mouse to position the cursor as needed.
To select a single cell	Click three times inside the cell or drag over the cell's contents.
To select the entire	Single click on the table move handle on the top left corner

table

of table or press the **Alt** key and double click in any cell of the table.

B. Adjust Column Width

Columns in a new table are always the same width. It is often necessary to change the width of one or more columns in the table, so that text or data can be seen.

Seminar	Time
Word Processing	9:00 AM – 10:30 AM

1. Position the mouse pointer on the column boundary (right-side of the column – seen below). The mouse pointer appears as a double vertical line with left and right arrows. Hold down the left mouse button, and then drag the mouse pointer either left or right to change the width.

Release the mouse button when you are satisfied with the new width.

Spreadsheet	11:00 AM – 12:30 PM
Presentation	1:00 PM – 2:00 PM
Database	2:30 PM – 4:00 PM

XVIII. Format a Table

Table Format has numerous table formats that may be applied to your table. These different **Table Styles** may affect the style of the lines or borders in the table, the justification of text and font formats. If your Word document contains more than one table, each table may have its own format.

Click on a **Table Style** of your choice.

Note: Shading and Borders can also be applied to one or more cells. The Shading and Border buttons are located in the **Table Styles** group as well.

B. Text Format and Alignment

Text within a table can be formatted the same way you format text in other areas of the document. Use the command buttons found on the **Home** ribbon.

XIX. Print a Document

Click on the **File** tab and select the **Print** option to print your current document. This will display the **Print** window options, along with a preview of the document to the right, such as the range of pages to print and the number of copies to print.

The default printer is the printer that your applications will use unless you specify otherwise. To change printers, click on the drop-down arrow next to **Printer Name**. This will display a list of installed printers and allow you to select another printer.

1. Select your desired options in the **Print** window.

2. Click on the **Print** button to print your document.

XX. Illustrations Demonstration

Original document: Festival.docx

Aspen Falls Winter News

Aspen Falls Sponsors Winter Jazz & Blues Festival

Aspen Falls is proud to announce that the city will be this year's sponsor of the Winter Jazz & Blues Festival. Founded in 1980, the festival takes place at the Aspen Falls Lakefront Park just southwest of the city. To go along with the music, the festival also features an array of food and beverages from restaurants in the area. Micro beers and wine from the Aspen Falls winery region will also be available. A variety of retail stores will also be selling CDs, books, shirts, hats, and other paraphernalia.

For further information, contact Mary Lou Pietela at (805) 555-5454.

Jazz & Blues Festival Wins Greener Festival Award

Aspen Falls Winter Jazz & Blues Festival has been awarded the Environmentally Responsible Festival Award. Ten festivals were presented the awards this year for their efforts in promoting and sponsoring environmentally responsible festivals.

The award is based on scoring in several areas such as event management, waste management recycling and water management. Points are awarded for festivals that can show an active plan to reduce on-site waste, recycle and compost wherever possible, reuse water and use sustainable power.

Some of the Jazz & Blues Festival efforts include the promotion of Refuse, Reuse, Reduce, Recycle, only allow recyclable materials within the festival site, observing the 'leave no trace' program and using parking income to help protect the nearby wetlands.

XX. Illustrations Quick Reference

The instructions in this section are a quick reference that will help you add illustrations onto your document as demonstrated in the previous section.

The Microsoft Illustrations group allows you to insert pictures, shapes, smart art, and charts into your document. These options will enhance the layout and appearance of your documents.

Drawing Tools and Picture Tools tabs only appear when a graphic image is selected.

A. Add a Picture

Microsoft Office is equipped with a Picture folder with several photo selections. You can also save additional photos to the Picture folder or create a new folder for your pictures. From the **Insert** ribbon, you can add a picture to your document:

1. Click on the **Picture** button, from the **Illustrations** group.
2. Navigate to your desired **Picture** folder.
3. Select a **photo**.
4. Click on the **Insert** button.

B. Online Pictures

Within Microsoft Office there are numerous online pictures (clip art and stock photographs) to illustrate a specific topic. From the Insert ribbon, add a graphic to your document:

1. Click on the **Online Pictures** button, from the **Illustration** group.
2. The **Insert Picture** window will appear.
3. In the **Search** box, type your desired graphic topic, and then press the **Enter** key.
4. Select your desired **Picture**, and then click on the **Insert** button.

B. Shapes

The Shapes option allows you to insert a variety of shapes on to your document, such as rectangles, circles, arrows, lines, flowchart symbols, and callouts. From the Insert ribbon, add a shape to your document from the multiple selections:

1. Click on the **Shapes** button, from the **Illustration** group.
2. The **Shape panel** will appear, select your desired shape.
3. The mouse pointer will change into a plus **+** sign.
4. Hold the left mouse button down, and while dragging your desired shape will appear.

Note: Continuing to drag the mouse will enlarge the shape.

C. SmartArt

SmartArt allows you to change graphic images into visual communication information including graphical lists, process diagrams, organizational charts, etc. From the Insert ribbon, incorporate SmartArt onto your document:

1. Click on the **SmartArt** button, from the Illustration group.
2. The **SmartArt** panel will appear.
3. Select your desired graphic image, and then click on the **OK** button.

Note: Depending on your selection, text and/or photos can be added.

D. Chart

To illustrate and compare data you are able to utilize the chart option. This is similar to the Excel chart feature. From the Insert ribbon, add a chart onto your document:

1. Click on the **Chart** button, from the Illustration group.
2. The **Chart** panel will appear.
3. Select your desired chart type, and then click on the **OK** button.
4. Your selected chart type will appear next to a spreadsheet.
5. Enter your desired data onto the spreadsheet and the chart will reflect your data.
6. On the spreadsheet window, click on the Close window button, and then your chart will appear on your document.

XXI. Quick References

A. Cover Page

Microsoft Word enables you to insert a variety of predesigned cover pages into your document automatically.

1. Click on the **Insert** tab, and then go to the **Pages** group.
2. Click on the **Cover Page** button.
3. The **Built-In** window will appear with predesign cover pages.
4. Select a cover page of your choice.
5. On the **Pages** group you can insert a **Blank Page** or **Page Break** as well.

B. Working with an Image

Images that appear on your document can be moved, resized, rotated, modified, or deleted. To change an image, click once on the image to select it. The following items will appear on the image: circle handles on each of the four corners, box handles on each of the four sides, and a green dot handle on the top of the graphic.

1. **Move** an image to another location on the document. Select the image and place the mouse pointer on the image. When the pointer changes to a double arrow cross, left-click the image and drag it to a new location on the document.

2. **Resize** an image to make it smaller or larger. Select the image and place the mouse pointer on one of the sizing handles (circles/boxes). When the pointer changes to a double-sided directional arrow, left-click the image and drag it until the desired size is achieved. Use a corner circle handle for the best results in resizing an image.

3. **Rotate** an image to a different angle. Select the image and place the mouse pointer on the curved arrow handle. When the pointer changes to a curved arrow, left-click the image and drag it in the direction you want to rotate the image.

4. **Modify** an image by changing its color scheme, style, location, and cropping. Select the image and then the **Picture Tools** ribbon will appear. Click on the **Format** tab and your image can be modified by clicking on the appropriate button within the Adjust, Picture Styles, Arrange, and Size groups.

Note: Before moving an image, you can change the way text wraps around the image. Select the image, click on the **Format** tab on the **Picture Tools** ribbon, and then click on **Wrap Text** button to select your wrapping option.
